

METHOD 3 · USDT (TRC20)

Buy & Send USDT on the TRON (TRC20) Network

Prefer a stablecoin? USDT on the TRON (TRC20) network has very low fees and fast confirmations. This guide covers buying USDT and sending it to the Soma Peptides USDT-TRC20 address from your order confirmation.

1

Buy USDT

On an exchange (Binance, OKX, Bybit) or wallet (Exodus, Trust Wallet), buy USDT with your card or bank.

2

Choose the TRC20 network

When withdrawing/sending, select the TRON (TRC20) network. This is critical — other networks will be lost.

3

Keep a little TRX for gas

TRC20 transfers cost a small amount of TRX. Most exchanges cover this automatically on withdrawal.

4

Enter our USDT-TRC20 address

Paste the exact USDT-TRC20 address from your Soma order confirmation.

5

Send the exact amount

Enter the exact USDT amount shown at checkout and confirm. Your order ships once payment confirms on-chain.

Important. Always send the **exact** amount shown at checkout, and always double-check the wallet address. Payments are irreversible. Questions? Email contact@soma peptides.us with your order number.
